

Do you see things in a **different** light?

At FLIR Systems, we do. We're the world's largest producer of commercial thermal imaging systems and we are growing at a fast pace. Our ability to see in total darkness and through smoke, fog and other obscurants provides a unique capability to clients around the world.

FLIR Systems was established in 1978 in the USA to pioneer the development of high performance infrared imaging systems. Today, FLIR Systems is the world leader in the design, manufacturing and marketing of thermal imaging systems for a wide variety of commercial, industrial and government applications. FLIR Systems is a high technological company traded on NASDAQ ("flir") and employs worldwide about 3.500 employees.

FLIR Intelligent Transportation Systems (ITS) with HQ in Marke (Belgium) is revolutionizing how traffic flows on roadways throughout the world. Traffic managers use intelligent technology from FLIR ITS to monitor and manage traffic streams. Be it for monitoring motorists and pedestrians in urban areas, for detecting incidents on highways and in tunnels, or for traffic data collection, FLIR's intelligent Video Detection and Monitoring Solutions enhance traffic safety and mobility on a daily basis. Taking full advantage of the unrivalled benefits of thermal imaging, FLIR ITS also contributes to increased safety and efficiency in public transportation. Our dedicated intelligent sensors for level crossing detection, platform safety, tunnel intrusion, fire detection, ... help public transportation operators to take the necessary safety measures.

To further strengthen the team of Project Managers in the Technical Support Services Team in Marke, FLIR ITS has a unique and exciting career opportunity available for a talented and experienced :

INTERNATIONAL PROJECT MANAGER Network- & Technical Support Engineer

YOUR MISSION

- After a training and introduction period you will be responsible for managing diverse high-technological and intelligent traffic & transportation projects and for delivering network- and other technical support to worldwide customers in all stages of the project execution.
- As part of the pre-sales support you will study the project camera and network design in order to make suggestions for improvements or to propose alternative solutions. You will work closely together with the Sales team by responding to technical and proposal requests from existing and prospective customers.
- You will assist with installation and commissioning of systems and equipment and you will ensure efficient, productive and high-quality technical support, training and customer service to clients, both on-site and via remote connection.
- In view of continuous product- and service improvement, you will exchange customer feedback and important market information with your colleagues. In the course of the project management cycle you will liaise with all internal and external stakeholders across multiple functions.
- You will monitor budget and timing targets and you will provide regular accurate updates and progress reports.
- You will report directly to the Head of Project Management & Technical Support in Belgium.

OFFER

Selected candidates can look forward to a competitive salary with company car and other benefits in an expanding, dynamic and stimulating international work environment with attractive growth and development opportunities.

YOUR PROFILE

- To qualify for this role you have a relevant and successful technical support experience as Project-, Service- or Application Engineer, preferably in a multidisciplinary high-technological environment.
- You definitely have strong network skills and a proven knowledge and hands-on technical experience with e.g. network configuration switches/routers, topology, the OSI model, pairing, load balancing, video over IP, multicast configuration etc.
- Technical knowledge of camera surveillance systems and installations is a plus, not a requirement.
- A solid knowledge of CentOS/Red Hat and Windows is a must.
- CCNA/CCNP Certification and knowledge of virtual platforms or programming skills (Java, Shell/Groovy Scripts) are an advantage but not essential.
- You are a result driven and customer focused professional with a strong sense of ownership and a high level of responsibility and dedication.
- You are a well organized and autonomous self-starter and multitasker with the ability to prioritize tasks and meet deadlines.
- You are prepared to travel regularly, up to 50% of your time.
- You are fluent in English with knowledge of other European languages as an asset.
- You are residing in or willing to relocate to Belgium (Flanders).
