

Signode is a leading transit-packaging provider, offering safe and effective products and solutions to customers globally. With over \$2B in revenue, 80+ manufacturing facilities across 6 continents and over 7,000 employees worldwide, **Signode** is a leading manufacturer of a broad spectrum of transit packaging consumables, tools, software, and equipment that optimize end-of line packaging operations and protect products in transit. **Signode** brings this extensive product portfolio together under hundreds of trusted brands to offer complete transit packaging solutions to its customers. **Signode** produces strap, stretch and protective packaging. The group also develops and manufactures packaging tools and equipment used to apply the bulk packaging materials. Main customer sectors include the food and beverage, chemicals, building materials and pharmaceutical industries. **Signode** is a pioneer in the industrial packaging sector with a long history of customer-focused innovations in materials, processes and automation technology that have revolutionized the sector.

To strengthen the Benelux Service and After Sales organization the company has an exciting career opportunity available for 2 experienced and motivated :

Field Service Engineers - Belgium

Industrial Packaging Solutions

MISSION

- After an intensive training period (Germany, Benelux) you will be responsible for the installations, repairs and maintenance of semi- and fully automatic industrial packaging machines and hand-equipment in different parts of Belgium (either Antwerp-Limburg or Brussels/Brabant-Liège) with occasional interventions elsewhere in Benelux.
- You will offer high-quality service to end-customers in a wide range of high-volume industries.
- You will be supported by the Backoffice and Customer Service team in The Netherlands for planning, spare parts, technical advice, orders and administration.
- You will guarantee customer satisfaction by providing assistance for technical improvements, changes and troubleshooting.
- On installation and start-up of new machines you will deliver support and training to customers on site.
- You will diagnose mechanical and electrical breakdowns and you will issue reports on repairs or replacements.
- You will report directly to the Benelux Service Manager.

PROFILE

- For these 2 vacancies we are looking for talented and versatile professionals with a technical degree in Electromechanics, Industrial Maintenance, Automation, Electrotechnics or similar.
- Ideally you already have experience in field service, technical support or maintenance for (semi-) automated machines and equipment in an industrial environment.
- A specific knowledge of PLC programming (preferably *Siemens*) is a plus, not a requirement.
- You are a dedicated and responsible person who shows a high degree of autonomy and flexibility.
- You are well organized and efficient and you have a thorough and methodic approach in dealing with and finding solutions for technical problems.
- You are customer-oriented and you can demonstrate excellent communication skills.
- Depending on your territory you are fluent in either French or Dutch. For both vacancies a good practical command of English is required.
- In this field-based position you will operate out of your home-office with occasional visits to the Benelux office in The Netherlands.

OFFER

The company offers a unique and attractive long-term career opportunity in a professional and international work environment, working with a world class brand. You can look forward to a competitive compensation package with company car.
