

Our client **Teledyne FLIR** designs, develops, manufactures, markets, and distributes technologies that enhance perception and awareness. **Teledyne FLIR** brings innovative sensing solutions into daily life through thermal imaging, visible-light imaging, video analytics, measurement and diagnostic, and advanced threat detection systems. **Teledyne FLIR** offers a diversified portfolio that serves a number of applications in government & defense, industrial, and commercial markets. Today the company is part of **Teledyne Technologies Inc.** (NYSE:TDY) world leader in enabling technologies to sense, transmit and analyze information for industrial growth markets, employing worldwide around 11.000 employees.

FLIR Integrated Solutions offers integrated end-to-end security and traffic safety (visual and thermal) camera systems. Traffic managers use intelligent technology from **FLIR** to monitor and manage traffic streams. Be it for monitoring motorists and pedestrians in urban areas, for detecting incidents on highways and in tunnels, or for traffic data collection, **FLIR**'s intelligent Video Detection and Monitoring Solutions enhance traffic safety and mobility on a daily basis. **FLIR** thermal cameras are the industry standard for 24/7 perimeter monitoring. In addition to thermal, **FLIR** is known for its first-class radars, visible cameras, elevated skin temperature screening solutions, video management systems, and command and control software for security applications.

To further strengthen the **international Technical & Field Support team** of **FLIR Integrated Solutions**, **Teledyne FLIR** has an exciting career opportunity available for a talented and experienced:

Technical Support Engineer US & Canada

Traffic Safety, Security & Critical Infrastructure Solutions

Operating out of South Central US

MISSION

Key purpose of your role is to deliver post-sales evaluation, support, service, commissioning, configuration and training for FLIR Integrated Solutions (Security & Traffic) products for customers throughout the US & Canada, incl. regular travel to customer sites. Your Key Responsibilities include:

- Providing remote and on-site application & product support to customers (i.e. end-users and system integrators) as well as internal teams. Collaborating with internal technical support teams on troubleshooting and resolving cases to ensure customer satisfaction in alignment with company goals.
- Providing regular updates and progress reports, creating and updating documentation and knowledge base articles and interacting with product engineering on issues that have been identified.
 Accomplishing work assignments in accordance with ISO 9001 and corporate Global Trade Compliance policies.
- Exchanging customer feeback with your colleagues in view of continuous product- & service improvement. Reporting directly to the Supervisor Integrated Solutions Camera Support.

PROFILE

• To qualify for this position you have a technical degree in Electronics, Information & Computer technology or similar with a relevant and successful experience in technical support as Project-, Service- or Application Engineer, preferably in a multidisciplinary high-technological environment. • An experience in the traffic and/or security electronics industry is a plus with knowledge of CCTV installations (incl. servers and network equipment) as an advantage. You ideally have a good basic understanding of current Linux OS and Windows platforms. • You are a mature, reliable and customer focused professional with a high level of autonomy, a strong sense of ownership and real commitment. • You are a well organized and result-oriented self-starter with the ability to prioritize tasks and meet deadlines. This customer-facing role requires strong interpersonal and communication skills. • You are fluent in English (verbal & written) with knowledge of other languages as a plus. • You are prepared to travel up to max. 50% of the time for periods of approx. 2-5 days per trip. • Ideally you are based in the South Central or Southwestern part of the US and able to operate out of your homeoffice in close proximity to a major airport hub.
