

TELEDYNE FLIR
Everywhere you look™

Our client **Teledyne FLIR** designs, develops, manufactures, markets, and distributes technologies that enhance perception and awareness. **Teledyne FLIR** brings innovative sensing solutions into daily life through thermal imaging, visible-light imaging, video analytics, measurement and diagnostic, and advanced threat detection systems. **Teledyne FLIR** offers a diversified portfolio that serves a number of applications in government & defense, industrial, and commercial markets. Today the company is part of **Teledyne Technologies Inc.** (NYSE:TDY) world leader in enabling technologies to sense, transmit and analyze information for industrial growth markets, employing worldwide around 11.000 employees.

Intrusions, security breaches, viral outbreaks and environmental hazards on top of potential false alarms and low-quality video are all challenges security personnel face. Customers can address these issues head-on with **FLIR End-to-End Security Solutions** and technologies that empower security personnel with the ability to detect, verify, respond, and report threats, leading to greater crime prevention and safer workplaces. As the global leader in thermal technology, **FLIR** provides the highest quality thermal security cameras in the marketplace. Today, **FLIR** thermal cameras are the industry standard for 24/7 perimeter monitoring. In addition to thermal, **FLIR** is known for its first-class radars, visible cameras, elevated skin temperature screening solutions, video management systems, and command and control software for security applications.

To further strengthen the **global Product Management team for Hardware Solutions**, **Teledyne FLIR** has an exciting career opportunity available for a talented and experienced :

Senior Product Manager

Thermal Security Cameras

Global Position - Based in Kortrijk, Belgium

MISSION

Key purpose of your role is to strengthen the market position of the Thermal Security Cameras product offering by managing and developing the hardware product portfolio and product line strategy in line with the overall segment and corporate strategy. Your Key Responsibilities include :

- Product planning and execution throughout the Product Lifecycle : from gathering and prioritizing product and customer requirements to defining the product vision and roadmap, conception and development, all the way to creating the go-to-market strategy and new product launches.
- Working closely together with engineering, manufacturing and sales & marketing in an international and multidisciplinary environment to ensure business and customer satisfaction are met.
- Building up profound product and market knowledge to create a vision that translates in concrete business cases and in successful products and solutions for Security customers in Critical Infrastructure.
- Being the driving force behind the ecosystem services that connect to your products.
- Reporting directly to the Senior Director Product Management Hardware Solutions.

PROFILE

- To qualify for this position you ideally have a higher degree in Engineering (e.g. Electronics, Mechanics, Industrial Technologies, IT) or Economics with a relevant experience in Product Management or Engineering Project Management for high-end technological solutions.
- You preferably have a background in the Security market or in related industries.
- You are able to initiate and drive the development of the product portfolio with a high sense of ownership, strong customer focus and an excellent understanding of the route-to-market.
- You are an independent team player with strong organizational skills, an analytic and strategic mind, a good business sense, improvement awareness and an unstoppable eagerness to learn.
- You are familiar with working in a cross-functional international team with the flexibility to deal with stress, shifting priorities and changing circumstances.
- You have excellent negotiation, communication and interpersonal skills and you are strong in championing change and innovation.
- You are fluent in English (verbal & written).
- This position is based in Kortrijk (Belgium) with regular travel and the flexibility to work remotely from your home office a couple of days per week.

OFFER

Teledyne FLIR offers a competitive salary with bonus, company car and other benefits in an expanding, dynamic and stimulating international work environment. You will have the opportunity to develop your career with the world's leading company in thermal imaging and sensing technology.

Teledyne FLIR and all of our employees are committed to conducting business with the highest ethical standards. We require all employees to comply with all applicable laws, regulations, rules and regulatory orders. Our reputation for honesty, integrity and high ethics is as important to us as our reputation for making innovative sensing solutions.

Teledyne FLIR is an equal opportunity employer.
